Rich Spilde

Partner

1800 Broadway, Suite 300, Boulder, CO 80302

P 303.473.4808

rdspilde@hollandhart.com

Rich provides strategic counsel to clients navigating the complex intersection of law, technology, operations, and business innovation.

With over 25 years of distinguished legal experience, Rich Spilde is a leading authority in technology law and transactions, AI, critical infrastructure, data protection, cybersecurity, IT, OT, and telecommunications infrastructure and services.

Rich leads the firm's data protection, cybersecurity, and AI group, and focuses on data privacy and information security matters including U.S. and international privacy and security law compliance, artificial intelligence, biometric technology implementation, critical infrastructure protection, information security risk assessments and audits, data breach incident response, records management and retention, service provider and vendor diligence, management, and oversight, and managing risk in IP, IT, OT, technology and commercial transactions.

Known for his practical and business-focused approach, Rich serves as a trusted advisor who translates complex legal and regulatory requirements into actionable steps and business strategies. He works closely with clients to understand their unique challenges and objectives, delivering solutions that balance legal compliance with operational efficiency and competitive advantage.

His extensive experience in structuring and negotiating complex multi-jurisdictional transactions and managing cross-border regulatory requirements and his understanding of technology and operational issues makes him a go-to counsel for organizations operating in today's interconnected global marketplace.

Having served as in-house counsel for a large communications company, Rich truly appreciates the challenges and opportunities clients face in order to exploit and preserve the value of their technology assets in a rapidly evolving environment. He delivers sophisticated, practical advice to help his clients identify issues and structure technology transactions that manage their risk, protect their data and intellectual property, and meet their strategic objectives.

Rich is recognized as a thought leader in technology law and regularly speaks at industry conferences and contributes to legal and business publications on emerging technology trends, privacy regulations, and cybersecurity best practices.

PRACTICES

Cross-Border Transactions
Data Privacy and Information Security
Emerging Companies
Intellectual Property
IP and Technology Transactions
Mergers and Acquisitions
Trade Secrets and Non-Competes

INDUSTRIES

Data Centers
Energy and Resources
Financial Institutions
Healthcare
Renewable Energy and Storage Technology

EDUCATION

University of Denver College of Law, J.D., 2000
Order of St. Ives
University of Denver Student Law Office
Transportation Law Journal, Member
Moot Court Board, Member

Colorado State University, B.A., 1995
Political Science

BAR ADMISSIONS

Colorado

EXPERIENCE

Cybersecurity, Risk Management & Incident Response

- Cybersecurity program development
- Third party, vendor and service provider security risk management program and policy development, diligence, oversight, management, and audit.
- Data breach and ransomware incident response planning, and data breach remediation, notification, and compliance assistance.

Data Protection & Privacy Compliance

- Advice and counseling on matters involving data collection, governance, handling, processing, storage, and transmission, and development of disclosures, policies, data retention, and data management practices. Privacy program development and implementation
- Cross-border data transfer strategies
- Regulatory compliance (GDPR, CCPA, CPA, PIPEDA, and emerging privacy laws)

Emerging Technology & AI

- Artificial intelligence governance, compliance, and risk management in transactions.
- Machine learning and algorithmic accountability
- Biometric technology implementation

Intellectual Property, Information Technology, and Technology Transactions and Licensing

- Intellectual property, idea, and trade secret protection, development, IP licensing and transfer transactions and strategic advice.
- Technology assets, solutions, equipment, and services development, marketing, licensing, deployment and distribution, including SaaS, cloud services, and open source software.
- Content and data protection, licensing, and distribution.

Strategic Sourcing and Procurement

- Advice and counseling in connection with RFP planning, vendor review and selection, contract structuring, and negotiation of business process outsourcing (including HR, payment processing, business processing outsourcing, call center, help desk and support services), information technology services, offshoring, and software, hardware, and services procurement.
- Transportation Logistics and Supply Chain Management
- Professional Services, consulting, independent contractor and master services agreements.

Telecommunications Services and Infrastructure

- Wholesale telecommunications services, including local access, network, private line, transport, wavelength, colocation, cloud, managed services, and other services.
- Critical infrastructure protection and cybersecurity.
- Development, construction, operations and maintenance, and acquisition of telecommunications facilities and infrastructure and access and use rights, including conduit systems, fiber optic cables and related facilities, submarine cables, cellular, DAS, small-cell, and other communications technologies and assets.
- Data center development, acquisition, construction, and operations.

Industry Experience

- Aerospace
- Banking & Financial Services
- Cable Television
- Critical Infrastructure Facilities and Services
- Data Center Operations & Services
- Healthcare
- Media & Entertainment
- Mining & Natural Resources
- Telecommunications Infrastructure and Services
